SKILLS

- C++ | C# | JavaScript | HTML | CSS/SCSS | Bootstrap | SQL | MVC | Git

PROJECTS

Trivia
A trivia game. Allows the user to play each set in easy, medium, and hard difficulties. Currently only works with one set of questions, but was built with the intention of working with an arbitrary number of sets.

FlashCards
A flash cards site capable of being used by different users. Users have a restricted number of sets and cards per set that can be created.

HomeworkTracker
Allows a user to track homework assignments for up to 4 classes. Tracks the name, completion status, total score, actual score and class of each assignment. Also provides a filtering system to view assignment for a particular class only.

MemoryMatch
(In progress). A memory card game made using Angular. Currently supports the proper card flipping animation for each card.
